

PaxeraView PRO

A Powerful PACS Workstation + Web Viewer

PaxeraView PRO is a powerful PACS workstation plus universal web viewer with no plug-in required, designed to provide superior performance and speed in the delivery and access of medical images and reports.

The solution enables users to access patient images on any browser or operating system and features annotations, measurements, and advanced visualization tools.

PaxeraView PRO

A Powerful PACS Workstation + Web Viewer

PACS Workstation

For complete management of your PACS database, the PACS workstation provides the platform to import studies, burn CDs, send and receive studies from other PACS, manage study information, and much more.

PaxeraView PRO comes equipped with many smart productivity tools that enable users to efficiently organize studies, diagnose, dictate, and report - all from a single login.

Web Viewer

The incorporated web viewers provides anywhere, anytime access to medical images and reports from any browser or operating system.

Physicians and users can now access images from any workstation – expanding the PACS range, accessibility, and accelerating turnaround time for any workflow environment.
